

Worming Offer

New
for 2015

Worms can be cause of some serious conditions in horses, including diarrhoea and colic. For this reason it is important to be sure your horse's worms are kept under control.

Since frequent worming can be unnecessary, expensive and will encourage drug resistance in worms, at Buckingham equine Vets we recommend a monitoring system using worm egg counting combined with once annual worming therapy.

To make this easy for our clients we have formulated our very own 'Worming Offer' that will ensure worms are kept under control while also reducing your worming costs.

What **does** the package include?

- Three worm egg counts during the summer including reminders they're due
- An Equest Pramox wormer for the early Spring or late Autumn
- Buckingham Equine Vets 'Worming Advice' sheet and 'Wormers Explained' sheet- all the information you need to know to keep your horse's worm under control. This will be emailed to you on starting the Worming Offer.
- Peace of mind your horse's worming protocol is complete

What **doesn't** the package include?

Any additional wormers needed should the worm levels be found to be high following worm egg counting of the dung. Veterinary advice will be given on the most suitable wormer for you to use.

How much is the Worming Offer?

£47.50
per year
